| Item                                   | Description                                                                                                                                                                       | Qty | Unit Price | Total    |
|----------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|------------|----------|
| AMD Ryzen 9 7950X3D CPU                | High-performance desktop CPU optimized for Blender rendering, 4K video editing, and gaming with 16 cores, 4.2 GHz base clock, 5.7 GHz boost clock, 120W TDP, and Radeon graphics. | 1   | \$564.00   | \$564.00 |
| GIGABYTE X670E AORUS PRO X Motherboard | AM5 motherboard with PCIe 5.0, Wi-Fi 7, robust VRM cooling, 3+ M.2 slots, DDR5-6400 support, ideal for gaming and content creation workloads.                                     | 1   | \$400.00   | \$400.00 |

Subtotal: \$964.00 USD

Tax: \$0.00 USD

Total: \$964.00 USD

## Terms and Conditions

- Payment terms: 50% deposit upon order confirmation, remaining 50% due upon delivery.
- Delivery timeline: All components will be delivered within 10 business days to meet the end-of-month build deadline.
- Warranty: All hardware components come with a manufacturer warranty of at least 1 year covering defects and malfunctions.
- Support: Post-delivery technical support available for 30 days to assist with setup and troubleshooting.

- Cancellation policy: Orders can be canceled within 24 hours of confirmation without penalty; thereafter, deposit is non-refundable.
- Liability: Liability is limited to replacement or repair of defective components; no liability for data loss or software issues.

## **Implementation Notes**

- System assembly will be performed by certified technicians ensuring optimal component compatibility and cooling solutions.
- Initial BIOS and firmware updates will be applied to the motherboard and CPU to ensure stability and performance.
- System will be configured with recommended settings optimized for Blender rendering and 4K video editing workloads.
- Basic user training will be provided covering system operation, BIOS navigation, and maintenance tips.
- Integration support includes assistance with installing necessary drivers and software for content creation and gaming applications.

## **Next Steps**

- Confirm order and provide 50% deposit to initiate procurement and assembly.
- Provide any specific software or peripheral requirements to tailor system configuration.
- Schedule delivery and assembly date to ensure build completion by the end of the month.
- Prepare workspace for system installation including power and network setup.
- Plan for post-delivery training session to maximize system utilization and performance.
