Subtotal:

\$500,000.00 USD

Tax:

\$0.00 USD

Total:

\$500,000.00 USD

Terms and Conditions

- Payment terms: 50% upfront deposit upon order confirmation, remaining 50% due upon successful installation and configuration.
- Delivery and installation: NAS server will be delivered and installed onsite within 1 month from order confirmation, subject to customer providing necessary access and environment readiness.
- Warranty: The NAS server hardware and software are covered by a 12-month warranty starting from the date of installation, covering defects and malfunctions under normal use.
- Support and maintenance: Comprehensive support and maintenance package includes 24/7 remote support, onsite visits as needed, and software updates for the duration of the contract.
- Data protection and backup: RAID 5 configuration ensures data protection; however, customer is responsible for maintaining backup schedules and data integrity.
- Liability limitation: The provider is not liable for data loss beyond hardware failure covered under warranty or for delays caused by customer-side issues.

Implementation Notes

- Deployment will be scheduled promptly upon order confirmation to meet the 1-month timeline requirement.
- Onsite installation includes physical setup, RAID 5 configuration, and network integration to support 5 concurrent video editors.
- Initial data migration and weekly backup setup will be configured to handle 2GB video files with permanent retention as specified.
- Training session will be provided for customer's IT staff and video editors on system usage, backup procedures, and troubleshooting.
- Integration with existing IT infrastructure will be assessed and optimized to ensure seamless operation and minimal disruption.

Next Steps

- Confirm order and provide deposit payment to initiate procurement and scheduling.
- Prepare the installation site with necessary network and power infrastructure ready for deployment.
- Schedule onsite installation date within the next 2 weeks to ensure timely deployment.
- Coordinate with IT staff for training session scheduling post-installation.
- Establish backup policies and procedures in collaboration with the support team to ensure data protection and retention requirements are met.
