Quote Details

Item	Description	Qty	Unit Price	Total
Synology DiskStation DS1821+ (8-bay NAS)	8-bay NAS chassis with AMD Ryzen processor, scalable up to 32 GB RAM, supports RAID configurations and SSD caching for high-speed video backup and data redundancy.	1	\$1,000.00	\$1,000.00
Seagate IronWolf Pro 16 TB NAS Drives	NAS-optimized 16 TB hard drives with AgileArray technology for RAID optimization, designed for continuous operation and high workload rates, ideal for video backup storage.	3	\$440.00	\$1,320.00
Intel X550-T2 Dual Port 10 GbE Network Interface Card	Dual port 10 Gigabit Ethernet NIC to enable high-speed network connectivity for fast video data transfers.	1	\$250.00	\$250.00
Netgear ProSAFE XS708E 8-Port 10 GbE Switch	8-port 10 Gigabit Ethernet switch to support high-speed networking for NAS and workstations, ensuring efficient video backup transfers.	1	\$700.00	\$700.00
Cat6a Ethernet Cables (10 ft, pack of 4)	High-quality Cat6a Ethernet cables rated for 10 GbE to ensure optimal network performance.	4	\$25.00	\$100.00

Subtotal: \$3,370.00 USD

Tax: \$269.60 USD

Total: **\$3,639.60 USD**

Terms and Conditions

- Prices are valid for 30 days from the date of this quote.
- Payment terms: 50% upfront, 50% upon delivery and installation.
- Warranty on hardware components is subject to manufacturer terms.
- Installation and configuration services are available at additional cost.
- Otsuka Corporation is responsible for ensuring network compatibility and infrastructure readiness.

Implementation Notes

- Install and configure Synology DS1821+ with RAID 5 using the three 16 TB NAS drives for data redundancy and performance.
- Upgrade NAS RAM if necessary based on workload requirements.
- Set up 10 GbE network infrastructure using the Intel X550-T2 NIC and Netgear XS708E switch.
- Use Cat6a cables to connect NAS and workstations for optimal transfer speeds.
- Test backup and restore processes to ensure data integrity and performance.

Next Steps

- Review and approve the quote.
- Confirm budget and procurement timeline.
- Schedule installation and configuration with our technical team.
- Provide network infrastructure details for compatibility assessment.
- Plan training sessions for IT staff on NAS management and backup procedures.
